Ambient Water Proceeds Through Installation Process: Shares First Photos and Video of 'Ambient Water 400'

'Ambient Water 400' began generating water shortly after install at Houston-area cryogenic storage and transportation facility

SPOKANE, WA – February 18, 2015 – Ambient Water (OTCQB: AWGI), a leading provider of atmospheric water generation systems for extracting water from humidity in the air, today revealed multimedia comprised of images and video of the first ever commercial installment of its 'Ambient Water 400' atmospheric water generation system. The system is currently deployed at Applied Cryo Technologies' facility in Houston, Texas.

A series of photos, along with a video of the technology, can be seen by visiting the News section of Ambient Water's website.

"It's exciting to see the 'Ambient Water 400' installed and already producing water via a renewable process. We've always had confidence in the system's capabilities, but to witness immediate results it in the field is quite rewarding," said Keith White, Founder and CEO of Ambient Water. "We're also thrilled to be able to share these great photos and video with our shareholders, industry partners, and members of the media, to provide them with a visual of the technology. This is a terrific milestone for Ambient Water."

Ambient Water's patented atmospheric water generation technology literally makes water out of thin air, transforming humidity into an abundant source of clean water near the point of use. With multiple systems already commercially available or in development, the Company's technology produces clean and fresh water for a host of commercial industries including process water for hydraulic fracking in the oil and gas industry and agriculture, while also providing fresh drinking water for homes, offices, and communities.

About Ambient Water, Corp.
Ambient Water pioneered atmospheric water generation technology for extracting water from humidity in the air. Drawing from the renewable ocean of water vapor in the air that we breathe, the Company's patented technology cost-effectively transforms humidity into an abundant source of clean water near the point of use. The scalable and modular systems can be configured for a number of water-sensitive applications ranging from oil and gas exploration to vertical farming. The systems can also be configured to produce high quality drinking water for homes, offices, and communities. For a thirsty planet on the verge of a water crisis, Ambient Water makes clean water out of thin air. To learn more about Ambient Water, visit our website at http://www.AmbientWater.com.

Safe Harbor Statement
Matters discussed in this press release contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995.
